

*The Florida Justice Reform Institute Supports  
CS/CS/HB 837, Which Would Replace  
Pure Comparative Negligence with Modified  
Comparative Negligence in Most Cases*

Florida's system of pure comparative negligence should be revised in favor of modified comparative negligence—the doctrine applicable in the majority of states which accounts for situations in which a plaintiff is predominantly at fault for his or her injuries. The Institute therefore supports the following amendments to section 768.81, Florida Statutes, proposed in CS/CS/HB 837 (“HB 837”), Section 11, which would amend section 768.81, Florida Statutes, as follows:

768.81 Comparative fault.—

(2) EFFECT OF CONTRIBUTORY FAULT.—In a negligence action, contributory fault chargeable to the claimant diminishes proportionately the amount awarded as economic and noneconomic damages for an injury attributable to the claimant's contributory fault, but does not bar recovery, subject to subsection (6).

(6) GREATER PERCENTAGE OF FAULT.—In a negligence action to which this section applies, any party found to be greater than 50 percent at fault for his or her own harm may not recover any damages. This subsection does not apply to an action for damages for personal injury or wrongful death arising out of medical negligence pursuant to chapter 766.

## **Introduction**

There are several doctrines that concern how liability for a plaintiff's injury will be apportioned where the same injury was caused by the negligence of more than one tortfeasor. As provided below, these doctrines include contributory negligence, pure comparative negligence, and modified comparative negligence, each of which govern the effect of the plaintiff's own negligence in contributing to his or her injury on the plaintiff's ability to recover from a defendant whose negligence also contributed to the injury:

- Contributory Negligence: A plaintiff whose own negligence contributed to his or her injury in any proportion of fault is barred from recovery in a negligence action against another negligent person or party who contributed to the plaintiff's injury. Under this doctrine, as long as the plaintiff is at least 1% at fault for causing his or her own injury, he or she is completely barred from recovering in a negligence action, even where another party was 99% at fault for causing the injury.
- Pure Comparative Negligence: A plaintiff whose own negligence contributed to his or her injury is not barred from recovery of the proportion of fault attributable to a negligent person or party who contributed to the plaintiff's injury, regardless of the plaintiff's percentage of fault. For example, if the plaintiff is 80% at fault for causing

his or her own injury, the plaintiff may still recover the remaining 20% from the defendant or defendants that are also found at fault for the plaintiff's damages.

- Modified Comparative Negligence:<sup>1</sup> A plaintiff whose own negligence contributed to his or her injury is only barred from recovery against another negligent person or party who contributed to the plaintiff's injury if the plaintiff's percentage of fault exceeds a certain threshold. Different jurisdictions adhering to this doctrine apply different threshold percentages of fault. For example, if the threshold is 50%, a plaintiff who is 50% or more at fault for causing his or her own injuries would be barred from recovery, but a plaintiff 49% or less at fault could still recover.

As discussed below, today Florida adheres to the doctrine of pure comparative negligence. This again means a plaintiff can recover that portion of their damages caused by a defendant's negligence no matter the degree of fault belonging to the plaintiff. Take the following examples:

- In *Bass v. Publix Super Markets*, Case No. 11-40881 CA 10 (Fla. 11th Cir. Ct. May 31, 2013), the plaintiff visited a store and injured herself after falling over a stock float, despite being told by a store associate to be careful of the stock float. The defendant store argued in response to the plaintiff's lawsuit that the stock float was open and obvious and therefore the plaintiff should have been aware of it. Ultimately, the jury determined that the store was negligent, but that the plaintiff was more so, and attributed 60% of the fault to the plaintiff and 40% to the defendant store. The jury returned a verdict of \$182,369.42 in damages, meaning that the store had to pay 40%, or \$72,947.77. A copy of the verdict form in *Bass* is attached as **Exhibit A**.
- In *Soler v. Publix Super Markets, Inc.*, Case No. 06-9387 CA 27 (Fla. 11th Cir. Ct. Aug. 18, 2009), another slip-and-fall case, the jury found the plaintiff predominantly negligent—75%—but found the grocery store defendant was 25% negligent. Thus, the grocery store was liable for 25% of the plaintiff's damages. A copy of the verdict form in *Soler* is attached as **Exhibit B**.
- In *Dominguez v. Publix Super Markets, Inc.*, Case No. 08-46176 CA 10 (Fla. 11th Cir. Ct. Nov. 18, 2013), the plaintiff slipped and fell on a patch of laundry detergent that had issued from the top of a bottle that had just fallen from a store shelf. The entire incident—from the time a grocery store employee heard the bottle fall and ran to tend to it, to the time when the plaintiff slipped—consumed only 13 seconds. A jury found the plaintiff 75% negligent and the defendant grocery store 25% negligent. Thus, under the jury's verdict the defendant was liable for 25% of the \$234,000 in damages awarded to the plaintiff, or \$58,500. A copy of the verdict form in *Dominguez* is attached as **Exhibit C**. Ultimately, however, the Third District Court of Appeal reversed the jury's verdict because the grocery store was

<sup>1</sup> Note that the terms “modified comparative negligence” and “modified contributory negligence” are effectively synonymous. See David C. Sobelsohn, “Pure” vs. “Modified” Comparative Fault: Notes on the Debate, 34 Emory L.J. 65, 66-67 & n.8 (1985) (“Most states adopting comparative fault have partially retained the principle that plaintiff's contributory fault should absolutely bar recovery. Commentators generally call this approach ‘modified’ comparative negligence. . .”).

not negligent and could not be held liable given the short time the spill existed. *Dominguez v. Publix Super Mkts., Inc.*, 187 So. 3d 892 (Fla. 3d DCA 2016).

- In *Marshall v. Publix Super Markets, Inc.*, Case No. 2017-022895-CA-01 (Fla. 11th Cir. Ct. Dec. 15, 2022), the plaintiff alleged that they slipped and fell on oil in a grocery store. A jury found both the plaintiff and the grocery store negligent, attributing 70% of the fault to the plaintiff and 30% of the fault to the grocery store. Consequently, the grocery store still had to pay a portion of the plaintiff's damages. A copy of the verdict form in *Marshall* is attached as **Exhibit D**.
- In *Singletary v. American Multi-Cinema, Inc.*, Case No. 15-CA-935 (Fla. 2d Cir. Ct. Feb. 17, 2023), the plaintiff was found 83% at fault but still entitled to damages from the defendant who was found only 17% at fault. A copy of the verdict form in *Singletary* is attached as **Exhibit E**.

Like most other states, in the past, Florida applied the doctrine of contributory negligence in cases where the negligence of multiple tortfeasors contributed to the plaintiff's injury. Other states continue to apply these doctrines or variations or combinations of them. A Bloomberg Law chart providing the fault apportionment doctrine currently applied by each state in the United States is attached as an appendix.<sup>2</sup> The historical evolution of these doctrines in Florida jurisprudence demonstrates how courts and lawmakers have grappled with these complex issues and competing policy concerns over the years.

As shown in the attached chart, although almost all states have eliminated pure contributory negligence, the majority of states have chosen a modified comparative negligence system over one based on pure comparative negligence. Thus, Florida would be joining the majority of states in moving from pure comparative negligence to modified comparative negligence in most negligence actions.

## The Evolution of Florida Law on Apportioning Fault and Liability Among Tortfeasors

Prior to 1973, Florida common law adhered to the doctrine of pure contributory negligence. Thus, as long as the plaintiff was at least 1% at fault for causing his own injuries, he or she would be barred from any recovery on his negligence claim, even where another party was 99% at fault. *See Fabre v. Marin*, 623 So. 2d 1182, 1184 (Fla. 1993) (citing *Smith v. Dep't of Ins.*, 507 So. 2d 1080 (Fla. 1887)), *receded from on other grounds by Wells v. Tallahassee Mem'l Reg'l Med. Ctr., Inc.*, 659 So. 2d 249 (Fla. 1995). The policy rationale behind the adoption of this "all or nothing" rule was that only a plaintiff without fault was entitled to recover for his or her injuries: "one person being in fault will not dispense with another using ordinary care of himself." *See Louisville & Nashville R.R. Co. v. Yniestra*, 21 Fla. 700, 732 (1886).

---

<sup>2</sup> Per that chart, 4 states or jurisdictions follow pure contributory negligence (Alabama, Maryland, North Carolina, and the District of Columbia); 34 states follow modified comparative negligence, with the typical threshold being 50% or 51% (Arkansas, Colorado, Connecticut, Delaware, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, West Virginia, Wisconsin, and Wyoming); and 13 states follow "pure" comparative negligence (Alaska, Arizona, California, Florida, Kentucky, Louisiana, Mississippi, Missouri, New Mexico, New York, Rhode Island, Virginia, and Washington).

In 1973, the Florida Supreme Court abolished contributory negligence and replaced it with comparative negligence due to the inequity of completely denying recovery to a plaintiff in cases in which the plaintiff is partially at fault for his or her injuries. *See Hoffman v. Jones*, 280 So. 2d 431, 438 (Fla. 1973). By enacting section 768.81, Florida Statutes, in 1986, the Legislature codified the Florida Supreme Court's elimination of contributory negligence from Florida common law in *Hoffman*: "In an action to which this section applies, any contributory fault chargeable to the claimant diminishes proportionately the amount awarded as economic and noneconomic damages for an injury attributable to the claimant's contributory fault, but does not bar recovery." § 768.81(2), Fla. Stat. (1986). In addition, the Legislature also implemented a pure comparative negligence regime for apportioning fault and liability in negligence actions involving multiple tortfeasors: "the court shall enter judgment against each party liable on the basis of such party's percentage of fault and not on the basis of the doctrine of joint and several liability . . ." § 768.81(3), Fla. Stat. (1986).

Thus, in enacting section 768.81, Florida Statutes, the Legislature went from the extreme of pure contributory negligence—where even the slightest negligence by the plaintiff would completely bar his recovery—to pure comparative fault. The current version of the statute states as follows, with the complete abolishment of contributory negligence set forth in subsection (2) and the adoption of pure comparative negligence in subsection (3):

**(1) Definitions.**--As used in this section, the term:

(a) "Accident" means the events and actions that relate to the incident as well as those events and actions that relate to the alleged defect or injuries, including enhanced injuries.

(b) "Economic damages" means past lost income and future lost income reduced to present value; medical and funeral expenses; lost support and services; replacement value of lost personal property; loss of appraised fair market value of real property; costs of construction repairs, including labor, overhead, and profit; and any other economic loss that would not have occurred but for the injury giving rise to the cause of action.

(c) "Negligence action" means, without limitation, a civil action for damages based upon a theory of negligence, strict liability, products liability, professional malpractice whether couched in terms of contract or tort, or breach of warranty and like theories. The substance of an action, not conclusory terms used by a party, determines whether an action is a negligence action.

(d) "Products liability action" means a civil action based upon a theory of strict liability, negligence, breach of warranty, nuisance, or similar theories for damages caused by the manufacture, construction, design, formulation, installation, preparation, or assembly of a product. The term includes an action alleging that injuries received by a claimant in an accident were greater than the injuries the claimant would have received but for a defective product. The substance of an action, not the conclusory terms used by a party, determines whether an action is a products liability action.

**(2) Effect of contributory fault.**--In a negligence action, contributory fault chargeable to the claimant diminishes proportionately the amount awarded as economic and noneconomic damages for an injury attributable to the claimant's contributory fault, but does not bar recovery.

**(3) Apportionment of damages.**--In a negligence action, the court shall enter judgment against each party liable on the basis of such party's percentage of fault and not on the basis of the doctrine of joint and several liability.

(a) 1. In order to allocate any or all fault to a nonparty, a defendant must affirmatively plead the fault of a nonparty and, absent a showing of good cause, identify the nonparty, if known, or describe the nonparty as specifically as practicable, either by motion or in the initial responsive pleading when defenses are first presented, subject to amendment any time before trial in accordance with the Florida Rules of Civil Procedure.

2. In order to allocate any or all fault to a nonparty and include the named or unnamed nonparty on the verdict form for purposes of apportioning damages, a defendant must prove at trial, by a preponderance of the evidence, the fault of the nonparty in causing the plaintiff's injuries.

(b) In a products liability action alleging that injuries received by a claimant in an accident were enhanced by a defective product, the trier of fact shall consider the fault of all persons who contributed to the accident when apportioning fault between or among them. The jury shall be appropriately instructed by the trial judge on the apportionment of fault in products liability actions where there are allegations that the injuries received by the claimant in an accident were enhanced by a defective product. The rules of evidence apply to these actions.

**(4) Applicability.**--This section does not apply to any action brought by any person to recover actual economic damages resulting from pollution, to any action based upon an intentional tort, or to any cause of action as to which application of the doctrine of joint and several liability is specifically provided by chapter 403, chapter 498, chapter 517, chapter 542, or chapter 895.

**(5) Medical malpractice.**--Notwithstanding anything in law to the contrary, in an action for damages for personal injury or wrongful death arising out of medical malpractice, whether in contract or tort, if an apportionment of damages pursuant to this section is attributed to a teaching hospital as defined in s. 408.07, the court shall enter judgment against the teaching hospital on the basis of such party's percentage of fault and not on the basis of the doctrine of joint and several liability.

## **Modified Comparative Negligence Strikes a Fair Balance Between Pure Contributory Negligence and Pure Comparative Negligence**

A doctrine of modified comparative negligence would reduce the number of lawsuits by plaintiffs who are predominately responsible for their own injuries and thereby result in reduced litigation and insurance costs. Moreover, a modified comparative negligence approach strikes a fair balance between the harshness of pure contributory negligence as compared to pure

comparative negligence. *See Mitchell v. Ross*, 470 N.E.2d 245, 248 (Ohio Ct. App. 1984) (explaining that modified comparative negligence “remove[s] the absolute bar to liability of the doctrines of contributory negligence and assumption of the risk, and [] substitute[s] instead a judgment of balance”). As an Ohio court observed, that state “has made the policy determination that it can encourage safe conduct without denying a plaintiff recovery when a plaintiff is less than 50 percent negligent for his or her injuries. Thus, Ohio’s [modified comparative negligence] statutory scheme reflects a compromise between (at least) two policies: requiring persons to act with reasonable care and compensating plaintiffs for their injuries.” *Estate of Sample ex rel. Cornish v. Xenos Christian Fellowship, Inc.*, 139 N.E.3d 978, 988 (Ohio Ct. App. 2019). Florida should make the same compromise.

Consequently, the Institute supports HB 837, which would amend section 768.81, Florida Statutes, to revise Florida’s existing negligence system and instead apply modified comparative negligence, the doctrine of comparative fault embraced by most states, in most negligence actions excepting those sounding in medical negligence.

## Apportionment of Fault Rules

States have varied approaches in how they apportion fault and liability in negligence cases. Some are based in common law and some have been codified. Many states have changed their approach over the years. This chart provides a starting point for researching these issues. Note that this chart covers fault and liability in claims based on negligence, and not other tort claims, such as strict liability or intentional torts.

In determining fault in negligence cases, states employ either **contributory negligence** or a pure or modified form of **comparative negligence**. States also have different approaches to **allocating liability among joint tortfeasors**—that is, whether defendants are jointly and severally liable for all damages, whether defendants are only severally liable, or whether the state follows a modified approach falling somewhere between the two. Finally, states differ in whether they allow, require, or forbid the **apportionment of fault to third parties**. This can impact the apportionment of fault to the parties and thus the amount of recovery.

The source materials for the rules listed in the chart are often found in a **Point of Law** (POL). The Points of Law tool identifies legal principles in court opinions that can then be filtered by jurisdiction. Other source materials are links to BCite Analyses. BCite links are used when the relevant legal principle is discussed in a seminal case. The link takes you to that case and other cases citing to it.
